Dear Colleague:

Please come join us as we celebrate excellence in military medicine.

On Friday, September 2, the University’s School of Medicine will host an exhibit of U.S. Army medical innovations that could be useful in practice and in combat zones. The exhibit, on Bigelow Boulevard between the Cathedral of Learning and the William Pitt Union, will bring several Army medical assets to campus from 8 a.m. to 7 p.m.

Visitors will have the opportunity to tour the Army’s Medical Marketing Semi (MMS; below) and the Deployable Rapid Assembly Shelter (DRASH).

In addition, the University’s Human Engineering Research Laboratories’ advances in rehabilitation technology will be on display, and Pitt faculty members will explain ongoing School of Health and Rehabilitation Sciences research that is being sponsored in part by the military and Veterans Affairs.

This event also will celebrate the University of Pittsburgh’s 100th year of offering ROTC participation for its students. ROTC cadets will be on hand as a color guard and to answer questions about the program.

Come join us for this novel chance to see the groundbreaking and important medical accomplishments of the U.S. Army and talk with the personnel behind them.

Sincerely,

Arthur S. Levine, MD
Senior Vice Chancellor for the Health Sciences
and John and Gertrude Petersen Dean, School of Medicine

Loren H. Roth, MD MPH
Associate Senior Vice Chancellor for Clinical Policy and Planning, Health Sciences
Distinguished Service Professor of Psychiatry
Senior Advisor, UPMC Health Plan
